R.V LABELS

Home

Welcome to the world of labels. RV makes labels in all possible kinds and types for a variety of applications catering to the evergrowing needs of the clients. From design to manufacturing you get all services at one point.

RV spells versatility and creativity with sophistication in manufacture using the latest line of automated computerized equipments. We offer paper labels, woven labels, taffeta labels, laces and tapes made to your design and specifications at the best possible price and to your delivery schedules.

Make RV Labels your supplier of labels and you never will have to look anywhere else in the world. RV is your label world.

About Us

RV labels started operations a couple of decades ago in a modest way. Thereafter, as our fame and reputation for quality grew we expanded operations. Today, we are equied with two units in Sonapat, Haryana, with separate lines for jacquard woven labels, heat transfer labels, printed labels and a variety of laces and satin tapes used in fashion apparels. We have become the de-facto source of labels for the fashion industry in India because we have gained trust and we have a reputation for excellence in everything we do.

For us no customer is small. Ask us to deliver a million labels and we can do it fast. Ask us to develop a different design or combination in lace or tape or jacquard label and we can do it in a customized way. We manufacture in millions but we are creative too. We want our client's products to stand out with superb labelling. We are also flexible in customizing products and services to suit our clients. Whether it is assured timely deliveries of labels or development of new designs and types, we take care of everything. Our custom created laces, for example, have helped apparel creators gain a distinctive edge in a crowded marketplace. If we commit a particular design of lace to one buyer, no one else gets it.

RV Labels is family owned and operated so we have an ethical way of treating employees, vendors and customers as part of a family. We care for everyone and it shows in our actions.

Woven Labels

In woven labels we use different colored threads in automated computer controlled weaving equipment to create designs that are permanent. The woven labels are made of thread and the result is a fabric that carries your design or logo permanently. It is soft and can be used for apparel, blending perfectly with contours of the garment.

Woven labels are widely used by garment manufacturers as well as manufacturers of accessories to brand the product. Apart from this the label can have useful information such as size, composition of fabric and tips on use such as wash in cold water or warm water or machine wash. As such woven labels are an integral part of any branded apparel. Labels act as identifiers and can give shippers the above information at a glance. Our woven labels are manufactured using specially selected yarns. We can custom use yarns to suit the fabric of the apparel to give even better conformity in looks. Labels can be used on the outside for

Printed Labels

RV Labels can manufacture printed labels in single, two and multi-color made on our high speed automated printing equipment. These printed labels are available with substrate of paper, foil or plastic film in various thickness. Labels may be self adhesive type or non-self-adhesive types as may be needed by customers. Our range of printed labels includes barcode, computer labels, hologram barcode and product labels. From small to large labels in low or bulk quantity, you can get precisely what you need right here.

Satin Printed Labels

Fashion designers and garment creators are always looking for new ways to add a touch of bling and a dash of style to their creations. We offer satin printed labels to help such designers and garment manufacturers offer something eye-catching and attractive.

RV Labels has complete in-house manufacturing facilities for satin printed labels. We select yarn from approved sources. The yarn undergoes a process of quality checks and then it is dyed and then checked again for color consistency. The yarn is then used to manufacture continuous satin tapes in standard widths. We then print satin fabric with design of choice of our clients using a variety of techniques such as heat transfer, embossed heat transfer or simple screen printing according to requirements. The entire process is fully automatic with quality checks at each stage to ensure perfection in each print. We can create satin printed labels in any desired width or length. These are available in bulk continuous wound reels. As for the design to be printed we can develop it in-house or we use customer-supplied graphics.

Taffeta Printed Labels

RV Labels offers a wide range of taffeta printed labels. We have complete in-house manufacturing capabilities. For the taffeta fabric we use rayon or acetate and polyester as required by the client. Then we have in-house dyeing facilities to dye the fabric in order to match color shade specified by clients. This continuous fabric then undergoes printing using our state of art printing equipments. Up to 8 color printing is possible. The process is automated and computer controlled for predictable results.

Taffeta printed labels from RV Labels are of the highest quality and we are the first choice of quality garment manufacturers in the country. Taffeta labels can be put to a variety of applications. These labels are ideal for size labels, for care labels, as labels for furniture, apparel, furnishing, footwear and jeans. Taffeta also withstands laundry cycles very well and does not lose the color or looks over repeated washing. It also dries quickly. We have a no-compromise approach to ensuring highest quality standards and, at the same time, our

Cotton Printed Labels

RV Labels excels in offering the finest cotton printed labels. We pick cotton yarn in various grades to suit various types of labels. These are then mounted on our automatic continuous weaving machines to output cotton tapes. The width and thickness are customizable to suit requirements of customers. We also handle dyeing of the fabric in-house to ensure perfect color matching as specified by our customers. We can also customize weaving textures to suit requirements of buyers. The entire process is automated using computer controlled equipment in which we can input all required parameters to get the desired width and texture.

We are just as meticulous in the matter of printing cotton labels. We use specific dyes and processes that ensure color fastness and resistance to abrasion as well as repeated washes. Cotton labels may be affixed to apparel on the outside as a branding method, to the inside for size information, on furnishing fabrics or tapestry. We have capabilities to meet bulk requirement. At the same time, we take care of small requirements too.

Hang Tags

RV Labels has introduced hang tags that can go well with apparels and create brand aura. We offer finest quality printing and use of the right thickness and stiffness paper boards with automatic die cut and punching to achieve a unique shape. These tags incorporate a string or plastic tie to help you attach it to the garment.

Hang tags can be used for apparel and they are also suitable for use as price tickets, wrap bands and tags for products. Depending on the requirement of users we can custom design the tags in any shape and enhance looks by lamination, foil stamping, UP Spot Varnish, stringing, eye-letting and secure-attach attachment.

Apart from regular usage in fashion garments, hang tags are also suitable for use with corporate gifts and giveaways, which are smaller in quantity. RV Labels will create a custom shape and design for such small quantity hang tags and manufacture it for you.

Heat Transfer Labels

Single or multi-color, our heat transfer labels are available in various types and sizes to suit various substrates. From the minutest design to bold logos, anything can be transferred to your product to create a permanent print using heat-pressure method of application. Flat or contoured, our heat transfer labels are easy to put on. You can send us your design or leave it to us: we come up with the best heat transfer label to enhance your brand image.

We have installed the latest line of equipments for fully automatic manufacture of heat transfer labels. We offer heat transfer labels that are skin-friendly and halogen-free. For the convenience of our customers we offer labels as a continuous roll we also offer labels in cut form. These labels are all Oeko Tex standard 100 compliant. Our heat transfer label manufacturing process is controlled and we use specific substrates to ensure zero defect heat transfer process with easy peel off.

High Density Heat Transfer Labels

High density heat transfer labels are a different category and include variants such as high density and embossed high density types. High density heat transfer labels are characterized by an extra thick deposition of ink. This can be ideal for transfer to porous or smooth surfaces. In the case of porous surface it sticks well and in the case of smooth surfaces the high density label creates a raised effect. Embossed high density labels are particularly suitable when one wishes to achieve a reversed look in the case of brand name or logo with a particularly attractive 3D look.

Drawcode & string

Experts in narrow fabric manufacturing, RV Labels offer exquisite quality drawcode and string to enhance the look and functionality of apparels. We offer drawcode & string in elastic as well as non-elastic type in flat and round types.

We have total in-house manufacturing facilities and select the right blend of yarns to achieve the desired level of elasticity in elastic drawcode & string. Otherwise we choose synthetic fiber yarn for looks and high strength. Elastic drawcode & string is widely used in fashion apparel such as hoodies and leggings and specifically finds good use in sports apparel. Made to exacting specifications with quality control on each aspect, our drawcode & string can be pulled to twice the length and it will still spring back to original size. It is flexible and yet it does not lose its properties over repeated use, even outlasting garments.

Jacquard Tape

RV Labels is narrow fabric specialist and one of our top specialties is manufacture of jacquard tapes in the widest ranges and types to suit a variety of needs. We have high speed jacquard weaving machines with computer control. This permits flexibility in use of design input from a variety of sources. In addition, computer control allows us to control almost all parameters to very narrow limits to assure highest quality standard.

We manufacture jacquard tapes using a variety of yarns to suit end user applications. Our design and creative team can create interesting patterns for the weaves. In addition, we can take graphic design inputs or logo and incorporate it into the jacquard tapes to improve branding. If you need jacquard tapes in any desired width and in any desired color combinations simply get in touch. We custom manufacture jacquard tapes to help you with branding and to help fashion designers dream up novel applications. Our prices are just right.

Woven Elastic Tapes

it is the fashion these days to go for body hugging elastic apparel that incorporate lycra. These types of apparels require special labels that stretch along with the fabric and blend in seamlessly. This is important because use of ordinary labels would result in crinkling of the fabric at the place where the label is attached. Apart from labels, woven elastic tapes find other uses such as in borders of garments.

RV Labels has complete in-house manufacturing facilities to manufacture woven elastic tapes. We have full control over all aspects since we choose yarn with the right blend of fiber to assure the required degree of elasticity. This meticulous attention to detail ensures that the elasticity of the tape matches elasticity of the fabric and it becomes a seamless join. We offer woven elastic tapes in required thickness and widths in continuous reels. The elastic tapes can be dyed in required color to provide a perfect match to the fabric.

Satin Ribbons

Available in beautiful eye-catching colors and in varying widths, satin ribbons from RV Labels embody quality and perfection in each inch. We offer a range of standardized widths and colors. In addition, RV labels satin ribbons can be customized to match color requirements of clients. Manufactured using latest equipments, these satin ribbons will add value and a beautiful touch to your apparels besides being put to innovative uses.

Twill Tape

The herringbone pattern in twill fabric is found in denims used for jeans. Apart from that herringbone patterned twill tapes are widely used with knit fabrics to stabilize the seam. RV Labels offers a range of twill tapes in standard widths and weights according to requirement of users. In addition, we can custom create widths as buyers may choose to specify to suit their manufacturing purposes. This results in less wastage and economies of scale.

RV Labels has complete in-house manufacturing facilities to manufacture continuous twill tapes under exacting quality control procedures. We guarantee technical parameters and also assure a high degree of finish as well as required strength. Twill tapes are commonly folded around edges of fabrics and then sewn in place. This provides better strength and protection to the seams. From light to heavy weight and in any desired widths, we offer twill tapes to suit your parameters and your budgets.
